

# The Triumph of Skepticism

The sculpture "The Triumph of Skepticism" deals critically with the triumphant progress of skepticism in modern Man.

Suspicion and skepticism seem to dominate modern society.

This sculpture shows us the result of the triumph of skepticism: "A loser"!!

Skepticism can only take in our society with doubt, suspicion and slits instead of eyes. Through this diminished vision he is unable to perceive the magnificence of our Earth.

His starred expression is void of all high spirits and optimism. This is the natural process as skepticism devours happiness and well being.

---

How should I capture a frame of mind in clay?

From fantasy, without any form, its remoteness unfolds before our very eyes.

The look, the manner, just appeared unchanged and that was it! Further changes of expression occurred during the drying process, and I sensed immediately the obvious title: SKEPTICISM
